

CODY THE MOVIE

An all American Cowboy and Sharp Shooter
An Inventor and Pioneer
An Unlikely British Hero

This film is about a pioneer of UK aviation Samuel Cody, an American showman and an aviation pioneer, who from very humble beginnings and against all the odds was the first to achieve powered flight in the UK. Cody went on to win numerous flying competitions including the prestigious 'Michelin Cup' series using his own aircraft designed, built and flown by himself.

Samuel Cody was born in Davenport Iowa in the 1867 and started his life as a cattle herder and featured as a showman cowboy and sharp shooter in a large American circus. He travelled to Europe where his interest in Kites, Airships and Aircraft really took off with the British Army.

COWBOY • KITES • AIRSHIPS • AIRCRAFT

CODY THE PIONEER

On the 16th October 1908 an Anglo American Samuel Cody, in British Army Aeroplane No 1 carried-out the first recognised powered heavier than air flight in the UK in Farnborough, Hampshire’.

There was disbelief by the British establishment that Cody could even develop a powered flying machine therefore, the race was on to be the first to achieve powered heavier than air flight in the UK, the establishment versus the flying cowboy.

Cody designed, built and with limited budgets and time learned how to fly beating the best in Britain. He became the first to achieve powered heavier than air flight in the UK, a monumental achievement.

The importance of Samuel Cody in society today is to provide engineering inspiration and to highlight the bravery and perseverance required to succeed. Cody the movie will be the catalyst and the spark for the next generation of engineering pioneers.

Celebrating Samuel Cody and his achievements through a movie will enable millions of children to be exposed to this wonderful story, the story of adversity, failure and success providing children with the belief that the only limiting factor in their lives is how far they would really like to go as the sky really is the only limit.

CEFI Ltd with Bristol Systems Technologies Ltd have a driving passion to bring this story to life and with your interest and support we believe we can inspire the next generation and provide a lasting legacy which stands the test of time.

If you would like to be part of the movie, if can sponsor and/or support this MOVIE FOR THE NATION we would like to hear from you.
